

## **The massacre of the Palestinian people, revealer of the despicable face of Zionism and Imperialism!**

A demonstration of more than 30,000 Palestinian people in Gaza and the West Bank on the occasion of the “Earth Day” (Yum el-Arz), which every year has been protested by the oppressed people of Palestine against the occupation of Palestinian land by the Israeli occupying government, this year dealt with the brutal bloody attack by Israeli military.

The criminal Israeli army on March 30th, when the oppressed people of Palestine gathered at several border points to protest against the occupying policies of the mercenary government of Israel, deliberately deployed more than one hundred of its snipers and without any regards bullet riddled the freedom – loving Palestinian people, killing at least 18 people and wounding nearly 1,500 people.

According to news agencies, injury of more than 750 of the wounded was by gunshot.

Repressive encounters of Israeli government, that all the Imperialist media are attempting to portrait and call it the most democratic state in the Middle East, once again showed the true meaning of democracy in the eyes of these enemies of the people and demonstrated that under an occupying and anti – democratic regime, what brutal acts are named Democracy.

No wonder that Benjamin Netanyahu, the Israeli prime minister, while the world has become outraged with all the brutalities and crimes committed by the Israeli army, shamelessly supported it and declared “well done to our soldiers” that “with power” they protect themselves and Israel.

Of course, such an obscenity is not a strange thing, when American’s representative at the United Nations meeting to review this crime, consciously and openly refrains from condemning the assassin regime of Israel, and when Trump is in power in America and has announced that he is going to move the American embassy to Jerusalem, it only shows that with the support of the master, the Israeli government and its mercenary army, function as an American Imperialism club in the Middle East region, and it shall not hesitate to commit any crime against the Palestinian people.

Since the Palestinian have announced they will continue the “Earth Day” until “Nekbat Day” (Misery - Day), the day Israel was founded on May 25<sup>th</sup>, the Israel violence reflects the fascists wrath realizing this fact that despite all of their cruelties and despite the displacement of millions of Palestinian people, yet, these militant people, do not allow those fascists to celebrate the seventy years of occupation, oppression, and aggression in a calm environment.

Greeting to the resistance and persistence of the Palestinian people, and while we condemn the crimes of the occupying government of Israel against this popular resistance, once again,

we emphasize on the undeniable fact that due to the close bound between the Israeli government and U.S. Imperialism, the emancipation of the Palestinian people is also inevitably bound to the destruction of Imperialisms dominance and its mercenaries, and right to determine the fate of the people of Palestine can be realized only in free and democratic conditions that are created by the destruction of the enemies of the oppressed masses.

This fact is tied to the necessity for existence of a revolutionary leadership in the Palestinian people's movement.

**Victory to the Palestinian people's heroic struggle**

**Death to Imperialism and its Lackeys**

**Disgrace and hatred on the occupying government of Israel**
